

## Megawatt Recruitment Overview:

Megawatt Recruitment is a specialist recruitment firm that works with leading US and international firms to attract top talent for jobs in Renewable Energy, Carbon Capture, and related fields.

## Employer Overview:

Founded nearly 15 years ago, the company you consult for has over 175 clients globally and has contributed to nearly 15GW of operational solar capacity. It is a global leader in quality assurance, testing, and certification of solar photovoltaics (PV), battery energy storage systems (BESS), and related equipment such as cables, racking systems, and inverters. Headquartered in Asia but with European founders, this is a cosmopolitan company with a fabulous working culture.

When you represent this technical compliance and quality engineering consultancy, you will be developing and implementing custom quality assurance strategies for global leaders in solar manufacturing. Your input will have a direct impact on the growth of high-quality, domestic solar manufacturing capabilities and America's energy independence.

## Position Overview:

We are seeking a **part-time/freelance auditor** for an assignment to begin on January 20<sup>th</sup>, 2025 and other potential future assignments.

**Job location:** Remote from anywhere in the United States. Travel to U.S.-based manufacturing facilities required.

## Key Responsibilities:

- Coordinate inspections with factories
- Perform quality inspections and witness testing at solar facilities
- Ensure inspections are stringently performed in accordance with applicable IEC and other industry standards
- Prepare daily inspection reports
- Submit final reports in a timely manner
- Perform other duties as required

## Requirements:

- Must be willing to travel for 2-4 days at a time
- Bachelor's degree or above in relevant field such as physics, chemistry, materials science, engineering
- Work experience or school coursework related to testing, evaluating, or inspecting PV module materials, battery energy storage materials, or similar materials
- Knowledge of ISO 9001, 14001, 45001 systems
- Business proficient in written and spoken English in order to produce reports for corporate leadership

## Nice to have:

- Worked in a solar module manufacturing factory either directly in production, in a quality control/assurance position, or as a third party inspector/auditor
- Auditor certificates and other relevant system certificates

## Benefits:

- \$1,200 USD per assignment
- Company will book flights and hotels directly, so you do not have to front the expenses
- Reimbursable expenses include meals, ground transportation (taxi, car rental, bus, train, etc), parking & tolls, co-working space rental if needed, and other miscellaneous expenses.
